PCA Assessment Sample Report 2: Traumatic Brain Injury

Addendum

NOTE:

The information herein is provided for context to the reader of Sample Report 2. In the Sample Report 2 (TBI) template, you will notice the ‘No Change’ box is ticked for the medical and rehab rehabilitation section. This information has been provided in a previous PCA Assessment Report and there is no change since then. To increase efficiency for report writing this tick box has been included to reduce repetition of information.

BACKGROUND:

Mr. Jasmeet Singh is a 61 year-old man who sustained a traumatic brain injury in a motor vehicle crash on March 1, 2023. He has been diagnosed with a moderate-severe traumatic brain injury. Mr. Singh has been medically restricted from driving a motor vehicle. Prior to the motor vehicle accident, Mr. Singh had no significant past medical history. He was independent with all personal care and home management tasks. He drove a vehicle independently and was working full-time as a realtor. He lives with his wife in a townhouse complex. He has adult children who live nearby and help as needed. His wife does not work and is able to assist Mr. Singh at home and drive him around in the community.
